

Ace Buster Blackjack

Rules of Play

Ace Buster Blackjack is played using six (6) or eight (8) standard 52 cards decks and may be played only on tables utilizing an Ace Buster Blackjack style table layout. Ace Buster Blackjack shall be dealt and played following the standard rules of blackjack, except as follows:

Ace Buster Blackjack is an optional wager that pays on the outcome of the dealer busting (going over a total of 21) his hand. Once all the players' and dealer's cards are dealt and players have acted on their hand, the players have an option to place the Ace Buster Blackjack wager.

NOTE: All Ace Buster Blackjack wagers must be placed before the dealer acts on the dealer's hand. It cannot be placed if the dealer will not act on their hand (all players bust or have natural blackjack), or if the dealer has a natural blackjack.

The dealer will then follow standard house procedures for dealing the particular blackjack game that Ace Buster Blackjack is applied to.

If the dealer busts (goes over a total of 21), winning Ace Buster Blackjack wagers shall be paid according to the posted pay table. The amount paid out is based on the number of aces in the dealer's hand and the dealer's up card. If the dealer does not bust, all Ace Buster Blackjack wagers lose.
