

BIRTHDAY BET

RULES OF PLAY

“Birthday Bet” is a side wager for either ‘00’ or ‘000’ Roulette. The 36 non-zero numbers on the Roulette board are divided into 12 mutually exclusive sets of 3 (For example: “1-2-3”, “4-5-6”, “7-8-9”, etc.).¹ Each set corresponds to the 12 signs of the zodiac. Wagers may be placed on one or more sets. The roulette wheel is spun after all wagers have been placed. If the ball lands within the wagered set, then the player wins the First Spin Pay according to the posted payable and their wager remains on the table. Otherwise, the wager is lost. If the player wins the First Spin Pay, then they have a chance to win the Additional Spin Pay (in addition to their previous winnings) if the ball lands within the wagered set again and on any additional consecutive spins. The wager remains on the table until the ball does not land within the wagered set. When the ball does not land within the wagered set, the bet loses.
