6. Once all players place their bets, the dealer will press "START GAME" on the keypad. The sensors will then light up, indicating a progressive wager. The dealer will remove all progressive bets on the table.

7. The dealer will then follow standard dealing procedures for blackjack.
8. The player's Blazing 7's wager will win if the player has any 7's in their initial two cards (see payable)
9. If the player has two 7's in the first two cards and the dealer's up card is a 7, the player will qualify for one of the Three 7's payouts
 - a. Note – the "Two 7's" payout is based only upon the player's first two cards
10. After the dealer has completed the initial deal and revealed their up card, they may resolve the progressive wager immediately.
11. Once all bets have been reconciled the dealer will hit "END GAME. "
12. Paying a Progressive Winner:
 - a. The percentage pays (%) are paid from the progressive jackpot shown on the progressive meter.
 - b. When a player has a winning percentage pays (%), the dealer shall press the appropriate hand button on the keypad.
 - c. The dealer will contact a supervisor
 - d. Once the casino verifies the progressive win, the supervisor will press the confirm button. To complete the action, a Supervisor or Executive card (depending on jackpot level) swipe is required. This records the win onto the Game Manager computer and adjusts the meter appropriately for the prize won. House procedures are then followed for paying the prize.
 - e. When the dealer reconciles all action, he presses "END GAME." This resets the system to begin the next hand.
13. **Dealer Envy:** Envy payouts are paid directly to the dealer's tip pool when a qualifying hand is won by the player.
