

## RULES/PROCEDURES FOR RACE TO THE FLUSH

### **Rules of Play:**

“Flushed” is a patented game that has the feel of Roulette while placing your wager but has the excitement of a horse race. There is nothing like it on the market. With payouts as high as 1000 to 1, who would not want to play it.

1. Each player may play only one hand at a time. The casino should utilize an auto shuffler and should not allow hand shuffling.
2. All player wagering must be completed before the first card is delivered to the dealer’s play area. The player’s bet must be based on the minimum and maximum table limits posted by the casino. The wagers can vary on the different wagering areas, but may not exceed the table max unless authorized by the casino management.
3. After all wagers are posted, the dealer will call off wagering by the waving off the bets as in Roulette.
4. The dealer will deal one card at a time, face up, so all players can see. The dealer will then place that card in the appropriate column in front of them that mirrors the suit of the card. This process will continue until five cards have been placed in one column.
5. If none of the columns have five cards in them after 16 cards have been dealt, all wagers on the layout will be taken down as losing wagers except for wagers on the #17. Those wagers will be paid 35-1 odds.
6. The casino has the option of allowing additional side wager (switched 17) where all or some, of the 35-1 payout on the number 17 winning wager to be placed on a specific suit, where the player is hoping to pick the correct suit of the 17<sup>th</sup> card, to complete a flush. If the player guesses correctly the wager gambled would be paid 150-1. The amount not gambled will be paid 35-1.
7. When a flush is completed, the dealer will place a dolly marker on the number of cards it took to create the flush, if 16 or less. Winning wagers will be paid according to the listed paytables.
