

RULES OF PLAY

I Luv Suits Poker features head-to-head play against the dealer with three optional bonus wagers: Progressive, Flush Rush and Super Flush Rush. Players are dealt packets of 7 cards, and the dealer is dealt a packet of 7 cards. The object of the game is to get more suited cards than the Dealer.

If the player and dealer have flushes of identical length, the rank of the highest kicker card in the flush determines the winner. For example, Ac-7c-3c loses to Ah-10h-7h. Ace will be the highest card in the flush.

Copied hands push.

Rules and Dealing Procedures

1. Set the i-Deal shuffler to I Luv Suits Poker
2. To begin the game, players make an Ante wager. Players may also make the Progressive, Flush Rush and Super Flush Rush bonus bets.
3. The dealer, working clockwise from their left to their right, gives each player a packet of 7 cards and themselves a packet of 7 cards.
 - a. If using a shuffler that does not have the game definition already programmed in the software, use the following delivery method:
 - i. Dealer working clockwise from their left to their right, will give each player a packet of seven cards, and Dealer's hand last of seven cards.
4. The dealer then presses the green button on the i-Deal to dispense all the remaining cards and begin shuffling the next deck.

5. Players look at their hands and have a choice:
 - a. Fold or stay in the game by making a Play bet of;
 - 1x their Ante if they have a 4-card flush or less
 - Up to 2x their Ante if they have a 5-card flush
 - Up to 3x their Ante if they have a 6-card flush or more
 - b. The Progressive, Flush Rush and Super Flush Rush bonus wagers (if played) are always in action. If the player folds, the dealer will pick up the player's Ante wager and tuck the cards face down under the player's bonus wager that's closest to the dealer. All folded hand bonus wagers will be resolved at the end of each hand along with the remaining active hands.
6. The dealer then reveals their cards and sets their longest flush hand. The dealer's 7-card hand must contain at least a three-card 9-high flush or better to qualify.
7. If the dealer does not qualify, Play bets are immediately refunded and the Ante bet is paid 1-to-1.
8. If the dealer does qualify, working counterclockwise from right to left, compares their hand with the hand of each player that stayed in the game.
 - a. If the player's hand beats the dealer's hand, the Ante and Play bet will be paid even money.
 - b. If the player's hand ranks less than the dealer's hand, the Ante and Play bets will lose.
 - c. If the player's and dealer's hand result in a tie, then both the Ante and Play bets will result in a push.
9. Players win the Flush Rush bonus bet if they can make a four-card flush or better, even if they lose to the dealer. See paytables below:
