

## IGT Dynasty Live Blackjack Rules of Play

IGT Dynasty Live Blackjack is a variation to Blackjack in which a live dealer plays against players positioned at stand-alone electronic betting terminals. The game is dealt using real playing cards, according to the following rules:

- 1) The game may be played with either a four, six, or eight deck shoe.
- 2) A new game begins when the dealer presses "New Game" on the dealer terminal.
- 3) Before the operator configurable game wager timer expires, each player must place a wager on the main game and any of the optional side bets.
- 4) Game play begins with an initial player hand shared by all players, and a partial dealer hand dealt as follows: first card is dealt to the player hand, the second card is dealt to the dealer hand, and the third card is dealt to the player hand. The dealer will not deal themselves a hole card until the end of a player's game play.
- 5) All cards dealt after the initial three cards are community cards. Community cards may be shared by the dealer and participating players according to the following actions of the players:
  - a. Hit, which adds the next community card to a player's hand;
  - b. Stand, which adds no additional cards to a player's hand;
  - c. Double Down, if offered, requires an additional wager 2x the amount of the player's original wager and adds the next community card to their hand;
  - d. Split, if offered, allows the player to split two cards of the same value into two distinct hands, and requires an additional wager to be placed equal to the player's original wager. When this happens, one card is automatically added to each new hand; or
  - e. Surrender, if offered, allows the player to surrender their hand and receive no additional cards, in exchange for half of their original bet. Surrender is allowed only if the dealer does not receive a natural blackjack hand.
- 6) The dealer will use any subsequent cards beyond those required for an individual player hand to complete their hand.
- 7) If the operator configurable decision timer expires before a player has made a game play decision, the operator can configure the game to either have the player automatically stand, or automatically hit on hard 11 or less or soft 16 or less.
- 8) Once the players and the dealer have all necessary cards to complete their hands, the dealer will press the "Confirm Result" button to complete game play. The IGT Dynasty Live Blackjack system will automatically pay any winning wagers, and collect any losing wagers.
- 9) Optional side bets may be made in accordance with their approved rules for play.
