

## **RULES OF PLAY**

1. Jackpot Party Blackjack Progressive is an optional progressive wager for blackjack
2. Players must make a standard blackjack wager in order to participate in the Jackpot Party Blackjack Progressive bonus wager.
3. Jackpot Party Blackjack Progressive considers both the player's first two cards and the dealer's first two cards. Payouts start when the dealer's up-card is an Ace and increase when the dealer has blackjack. See payable for odds.  
Note: If the dealer does not have an Ace up or a blackjack the progressive wager loses.
4. To begin each round, players must make their standard blackjack wager. They may also place the progressive wager. Players must place the progressive wagers on the sensor in front of their betting position. The sensor will light up.
5. Once all players place their bets, the dealer will press "START GAME" on the keypad. The sensors will then light up, indicating a progressive wager. The dealer will remove all progressive wagers on the table.
6. The dealer follows house procedures for blackjack.
7. After all player decisions have been made, the dealer reveals their hole card and they may resolve the progressive wager immediately.
  - a. Working from right to left pay or take primary wager first.
  - b. Pay the progressive wager (if applicable) per the progressive procedures listed below.
  - c. Payouts are based on the highest hand ONLY.

**8. Progressive Winner:**

- a. The percentage pays are paid from the progressive jackpot shown on the progressive meter.
- b. Other hands are paid from the chip tray; they do not come off the meter.
- c. In the event more than one progressive meter pay hits during the same round, the dealer will first pay the player farthest on their right and then move counter-clockwise to pay other players. As Regulatory procedures permit, this policy can be replaced by casino internal controls.
- d. When a player has a progressive winner, the dealer will select the player spot corresponding to the player with the winning progressive hand. The dealer will then press the appropriate hand button on the display. (If the hand button is pressed by accident, pressing it again will turn it off.)
- e. The dealer shall then contact a supervisor.
- f. Once the casino verifies the progressive win, the supervisor will press the confirm button. To complete the action, a Supervisor or Executive card (depending on jackpot level) swipe is required. This records the win onto the Game Manager computer and adjusts the meter appropriately for the prize won. House procedures are then followed for paying the prize.
- g. Once the dealer has reconciled all action, they press "END GAME." This resets the system to begin the next hand.
- h. Once the Supervisor or Executive card (depending on the jackpot level) is swiped the prize is logged into the Game Manager. If the progressive pay needs to be backed out at this point, the award will need to be manually backed out using the Game Manager manual adjustment feature.
