

Rules of Play

JoColor Pai Gow Poker is regular Pai Gow Poker with an optional side bet.

Before any cards are dealt, players must place their regular Pai Gow Poker bet and have the option to place the side bet. As in regular Pai Gow Poker, after a dice cup is shaken, the dealer then deals each player and himself seven cards face down.

JoColor Pai Gow Poker Side Bet

The player is betting that his hand will be the same color or contain a joker. The joker can be any color. Any hand consisting of a joker and six cards of the same color qualifies. If the dealer hand is also the same color, the player's side bet is paid at higher odds. The pay tables are as follows:

Hand	Pays
Player hand is the same color, dealer hand is the same color, and player hand and dealer hand match in color	250 to 1
Player hand is the same color, dealer hand is the same color, and player hand and dealer hand do not match in color	100 to 1
Player hand is the same color with a joker	20 to 1
Player hand is the same color without a joker	10 to 1
Player hand has a joker	5 to 1

Only the highest winner is paid.
