

Let it Ride - Cover All Bonus

Rules and Procedures

1. The Cover All Bonus is an optional side wager for Let It Ride.
2. To begin, players make the standard base game wagers, any available side wagers and optionally, the Cover All wager, before the start of the round.
3. Casinos must set the i-Deal Plus shuffler to the "Let It Ride Cover All" mode.
4. Each player receives three cards according to the standard procedures for the base game. Additionally, two community cards are dealt face down on the layout.
5. After the dealer removes the community hand from the shuffler and presses the green button, the i-Deal Plus will determine the number of players in the round and display the payouts on its front screen.
6. Payouts are dynamic: They change depending on the number of players in the round.
7. The Cover All wager wins if the highest five card poker hand, from the player's three cards and two community cards, is a three-of-a-kind or better. Only the highest hand pays. If one player has four of a kind and another has a straight flush, the bonus for the straight flush is paid to all players participating in the Cover All wager.
8. The dealer resolves the game according to house procedures, with a few changes:
 - a. When the dealer comes across a hand that's three of a kind or better, they will leave the cards exposed on the table.
9. If the dealer finds a higher ranking hand, they will leave those cards exposed and remove any previous cards left on the table.
10. Once the dealer has finished reconciling all player base wagers, they will go back and reconcile the Cover All wager.
11. Below is the matrix for 1-7 players.
