

# Straight's & 8's

## RULES OF PLAY

Straights & 8's is a Roulette side wager that uses a series of consecutive roulette spins to determine game outcome. The game is played using either single zero or double zero roulette wheels.

Play begins with the player placing the optional Straights & 8's side wager on the forthcoming sequence of spins. Subsequent Straights & 8's wagers may only be placed after win/loss resolutions.

The Straights & 8's side wager wins if:

- (1) If the next three spins result in an 8, 18 and 28, in any order
- (2) If the next three spins result in three straight/consecutive numbers in any order or any three numbers ending in 8.
- (3) If the first two spins result in two consecutive numbers in any order
- (4) If the first two spins result in two numbers ending in an 8
- (5) If the next two spins two numbers that are separated by one number sequentially (gap) in any order.

Winning wagers are paid according to the following payable samples:

Spin Outcome	Paytable 1 (Single Zero)	Paytable 2 (double Zero)
8, 18, & 28 in any order	299 to 1	500 to 1
3 Straight or any 3 numbers ending in 8	50 to 1	50 to 1
2 Straight on first 2 spins	7 to 1	8 to 1
1 Gap on first 2 spins	4 to 1	4 to 1
2 numbers ending in 8 on first 2 spins	4 to 1	4 to 1
Others	Lose	Lose

**Note: The dealer will mark each number on the Straights & 8's Track to keep track of the straight/consecutive run with a Straights & 8's marker. The single and double zero do not count in the straights, consecutive numbers or gaps.**
