

Super 4 Progressive Blackjack is a side bet for blackjack games using one, two, four, six or eight standard decks of cards. To begin, each player must place the underlying blackjack wager and may optionally place the Super 4 Progressive Blackjack side wager.

After all wagers are placed, each player is dealt two cards while the dealer also receives cards according to standard blackjack rules. If the dealer's hand is a blackjack, the player's two-card hand and the dealer's hand are combined to form a four card hand.

This four card hand pays the player odds against the posted payable. Additionally, if the dealer has an ace up and does not have a blackjack, the player wins odds on the posted payable. (see sample below)

4-Card Hand	Paytable 1
Royal Flush (Chosen Suit)	100% Star Progressive
Royal Flush (Any other suit)	100% Spade Progressive
Three-of-a-Kind	100% Heart Progressive
Straight	750 for 1
Flush	250 for 1
Two Pair	200 for 1
All Cards Same Color	100 for 1
Pair	50 for 1
Any Hand	25 for 1
Dealer Ace Up (No BJ)	10 for 1

If the dealer's hand is not a blackjack and is not showing an ace, the Super 4 Progressive Blackjack side wager is lost.

Once the Super 4 Progressive Blackjack wager is reconciled, normal Blackjack play continues.
