

Twin Blackjack

Rules of Play

Twin Blackjack is a variation to the standard game of Blackjack. The game is played using any number of decks on a table designed so that each player always plays two consecutive blackjack spots.

To begin, each player must bet both betting spots and will not have the option to reduce to single betting in one twin play area. The game is then dealt per regular blackjack procedures. Players may take insurance on single blackjack hands.

However, on either a Twin Blackjack (Ace, Jack and Ace, King) or Identical Twin Blackjack (Ace, Queen and Ace, Queen) players will get paid immediately on each hand.

Payouts:

-Single Hand Blackjack 3:2

-Twin Blackjack 2:1

-Identical Twin Blackjack 4:1

Note: Accommodates five player positions with two betting spots/boxes each.
