

# Two Card Joker Poker Super Flush

## Rules of Play

Two Card Joker Poker Super Flush is a house banked poker game played using one standard 52 card deck plus two Jokers. Each card is ranked according to its poker face value (i.e., two, three, four, etc., up to Ace) while all suits are equivalent. The hand rankings are somewhat different compared to traditional poker. Jokers are only used to complete pairs.

Examples of hand rankings are as follows:

Hand Type	Example
Pair of Jokers	Joker, Joker
Royal Flush	Ace of Hearts, King of Hearts
Straight Flush	Jack of Clubs, 10 of Clubs
Straight	5 of Hearts, 4 of Diamonds
Pair	King of Hearts, King of Clubs or 5 of Spades, Joker
Flush	Queen of Clubs, 10 of Clubs
High Card	Queen of Hearts, 5 of Spades

To begin, players make an Ante wager and may also place optional Pair Up and/or Super Flush Bonus side wagers. The player and the dealer then receive two cards.

Players review their cards and decide to either Fold and lose their Ante wager, or play, by making a Call wager equal to the amount of their Ante wager.

After decisions have been made, the dealer settles all remaining wagers. The dealer must qualify with a Queen High or better.

If the dealer does not qualify, the player's Ante wager is paid even money and the Call wager is pushed. If the dealer does qualify, and has a higher two-card poker ranking hand, the player loses both the Ante and Call wagers.

If the dealer does qualify, and the hands tie, both the Ante and Call wagers push.

If the dealer does qualify, and has a lower two-card poker ranking hand, the player is paid even money on the Ante and the Call wager is paid according to the following payable:

Call wager payable (pays to 1)

Hand Type	Odds
Pair of Jokers	8
Royal Flush	5
Straight Flush	3
Straight or less	1

The Pair Up and Super Flush Bonus side wagers are paid according to the following paytables:

Pair Up side wager paytables (pays to 1)
