

Rules and Procedures

INTRODUCTION

VEGAS 3 Poker is a new table game played using a single deck of 52 cards. Each player and the dealer receive three cards combined with one community card to form their best 3 card poker hand. Vega\$ 3 Poker also offers optional side wagers that pay against their respective paytables.

RULES OF PLAY

1. To begin the game, players must make a wager on the Ante. They may also make the optional VEGAS-3, VEGAS-4, and/or if available the STAX Progressive side wagers.
2. The dealer will dispense packets of three cards to all players and the dealer.
3. The dealer will place one community card face down in the marked area of the layout.
4. The player must make one of the following decisions:
 - a. Check and make no additional wager; or
 - b. Wager 2x the amount of the Ante on the Play bet.
5. The dealer then reveals the community card.
6. For players who checked on the first decision, they must make one of the following decisions:
 - a. Fold. A player that folds will lose their Ante wager; or
 - b. Wager 1x the amount of the Ante on the Play bet.
7. The dealer will then reveal his three hole cards and combine them with the one community card to make his best three card poker hand and compare his hand against each player's best three card hand.

DEALER QUALIFYING

The dealer qualifies with an Ace-Queen or better.

In the event the dealer does not hold a qualifying hand, the Ante wager will receive no action and be pushed back to the player.

WINNING AND LOSING HANDS

The Ante, Play, and optional VEGAS-3, VEGAS-4, and STAX Progressive wager(s) will be resolved as follows:

Working from right to left, the dealer pays all winning wagers and collects all losing wagers.

1. If the player's hand beats the dealer's hand, the Play and Ante wagers win even money.

Rules and Procedures

2. If the player's hand loses to the dealer's hand, the Play and Ante wagers lose.
3. If the player's hand ties with the dealer's hand, the Play and Ante wagers push.
4. The VEGA\$-3 side wager wins if the player's original three hole cards contains a pair or better. See layout for odds.
5. The VEGA\$-4 side wager wins if the player's three cards and the one community card combined are a pair of Jack's or better. See layout for odd.
6. The STAX Progressive side wager wins if the player's original three hole cards contains a flush or better. See layout for odds.
