

WHEEL BET

Rules of Play

The "WHEEL BET" is a side bet that allows the player to make an additional side wager. This side bet pays a bonus if the ball lands on the same number as the previous spin. This side bet can be added to any standard roulette game.

To begin each round, players must make the standard roulette bets before the spin begins. Players may also place one additional side wager on the "Wheel Bet."

The deal then follows standard house procedures for dealing roulette.

All "Wheel Bets" that do not repeat on the first spin shall lose.

If the first spin is a repeat of a previous number, all wagers are locked in place with a clear plastic cup and no new "Wheel Bets" will be allowed until the completion of the current round.

Winning payouts are based on the number of times a number is repeated on consecutive spins of the roulette wheel.

Wheel Bet - Paytable

Outcome	Paytable (for 1)
Three Repeats	2,500
Two Repeats	300
One Repeats	20
