

Wheel of Madness

Rules of Play

Wheel of Madness is a variation to the standard game of Blackjack. The game consists of an optional side wager, where the player bets that they will receive a blackjack in their first two cards. If the player receives the blackjack, that player pushes a spin button that is placed in front of them by the dealer. Once the button is pushed, it activates a wheel to spin that is located at the blackjack table. The amount the wheel stops on is the amount the player will win.

All other aspects of the standard game of blackjack remain unchanged.

Note: Player wagers from \$1-\$5. The top award may be either \$500 or \$1,000.
