

xBacc

RULES OF PLAY

xBacc is an optional side bet for the standard game of Baccarat. The game is played using 8 standard 52 card decks.

To begin, players must wager on the main game of Baccarat. Players may also wager on the xBacc side bet by placing their wager on the first spot of a game run, choosing either Player or Banker.

Example game run:

 xBACC	BET			
Banker	1	2	3	
Player	1	2	3	X10

The dealer then deals a standard hand of Baccarat.

If the player chose the correct result as the winner of the first main game, the dealer places a BET indicator on the next column (to the right of the chip/s) on the game run, and players can now move their chip to the next column, and make their next selection (Player or Banker).

Each correct prediction will allow the player to make a guess for the next main game outcome.

If the player chose the incorrect result or the result is a tie:

The xBacc side bet is lost, the dealer collects the player chip/s from the table.

If the player correctly selects the correct results of all columns in a run, the player wins the multiplier (times their wager), shown at the end of the game run.

Note: Players must continue to place the standard Baccarat wager on each round of play. Players may select the length of the run for their wager, if multiple are offered by the licensee.
