

Dealer Envy Bets For 2G'\$ Rules of Play

Description

Dealer Envy Bets for **2G'\$ (2G'\$)** is an optional Roulette side bet where the player wagers that any two (2) consecutive greens (0, 00, or 000), depending on whether the roulette wheel includes 0 only, 0 and 00, or 0, 00, and 000, will be spun. This bet can be augmented with a "Dealer Envy" payout feature, which awards the dealer a multiple of the winning bet based on the envy pay multiplier applied to the player's original wager.

Game Flow

1. The player places the bet in the "2G'\$" Betting Spot.
2. The ball is spun:
 - a. **IF** a GREEN is spun (0 or 00 or 000), the bet remains in action.
 - b. The dealer will place a marker in the "2G'\$" Betting Spot to show that the bet is still working and that no additional bets can be placed on "2G'\$" until after the very next spin.
3. The very next spin determines if the **2G'\$** bet wins.
4. **IF** the very next spin is another GREEN (0 or 00 or 000), the player **WINS AND IS PAID UP TO** the following depending on the roulette wheel:
 - a. Single-zero layout (0 only): 1350 to 1.
 - b. Double-zero layout (0 and 00): 350 to 1.
 - c. Triple-zero layout (0, 00, and 000): 165 to 1.
5. **IF** the very next spin is not a GREEN, the player loses.
