

Game Description

Blazing 7's Progressive Cash Spin is a fixed amount progressive wager that may be configured with Blackjack games using 2, 6, or 8 standard 52-card decks and a table with a maximum of 7 players. The player may place the Progressive wager at the beginning of the game, at the same time as the normal wager. At the discretion of the operator, the Progressive wager may be optional or required. The game is then dealt and played as normal. The Progressive wager is based on the player's two initial cards and the dealer's face-up card.

Dealing Procedures

If the player's hand contains at least one initial 7, the wager wins and pays according to the payable. If the player's hand contains two initial 7s, then the dealer's card is additionally considered to determine the final award. If the player's hand does not contain any initial 7s, the wager loses. Certain awards will trigger a spin of a Cash Spin wheel, with the player receiving an award based on the outcome of the spin. Note that the player's original wager is not returned regardless of whether the player wins an award.

Envy Prize Option

Blazing 7's Progressive Cash Spin also has a payable option for an envy prize. Awards that trigger a spin of a Cash Spin wheel will also award an Envy prize to all other players at the table that participated in the progressive wager. These Envy prizes may be configured as fixed pays, or as pays from a separate progressive meter. For the fixed pay configuration, the listed pays are paid to each player except for the player that triggered the prize. For the progressive configuration, the listed percentage of the progressive meter is split between all players except for the player that triggered the prize. The listed fixed Envy pays are for a \$5 wager and must scale proportionally with the wager size. Note that the player's original wager is not returned regardless of whether the player wins an award.
