

Breakout Blackjack

Rules of Play

Overview

Breakout Blackjack is a blackjack variant played with 1, 2, 6, or 8 standard 52-card decks.

1. Wagering:

To start each round, players must place a main game wager, which is whether the dealer will win the hand or the player will win the hand. Players may also choose to place optional side wagers. Not all side wagers are available when the players wager that the player will win. Operators will set minimum and maximum wagering limits.

2. Main Game Rules:

Standard Blackjack dealing procedures are followed, unless the bet is for the dealer to win. In that case, the player's hand is played the same way as the dealer's hand, insurance is not available, and the bet is paid as follows:

- Dealer Blackjack and Player Blackjack: Push
- Dealer Blackjack and Player not a Blackjack: Pays 3 to 2 or 5 to 6, depending on the table's configuration.
- Dealer hand beats the Player hand: Pays 1 to 1.
- Dealer does not bust and player busts: Pays 1 to 1.
- Dealer and player both bust: Push.
- Dealer ends with 17 and player busts: Push.
- All other outcomes: The bet loses.

3. Optional Side Wagers:

- **Breakout Bonus:** Wins if both the dealer and player bust and pays based on the number of cards that cause the busts as shown Breakout Bonus payable. This bet is available only when the main bet is for the dealer to win.
- **Super Tie:** Wins when the dealer and player tie and includes a built-in dealer tip. It pays according to the Super Tie payable. This bet is available only when the main bet is for the dealer to win.
- **Pair Up Plus:** Wins when either the dealer or the player opens with a pair in their first two cards and pays according to the Pair Up Plus payable. This bet is not available in the one deck or two deck configurations of Blackjack.
- **Sweet 17:** Wins if the dealer's final hand is 17 and pays according to the Sweet 17 paytables.

Breakout Bonus Paytable

Outcome	Pays
6 cards	5 to 1
7 cards	5 to 1
