

# 10 In The Pocket

## Game Description

*10 in the Pocket* is a side bet that can be configured with traditional blackjack games that use a two, four, six or eight deck shoe and allow up to six total players. The side bet is available to be placed after a traditional deal where all players get dealt two cards face-up and the dealer gets one card dealt face-up and one card dealt face-down. The side bet must be placed before any other actions are made (including splitting and dealer peeks). The side bet pays out 2 to 1 if the dealer's face-down card has a value of 10, otherwise the wager loses. The side bet will always be resolved regardless of the outcome of any other blackjack wagers.
